Activity 1: Interactive and visually appealing dashboards

Creating an effective Streamlit dashboard involves presenting business data stored in Snowflake through clear, interactive, and easy-to-understand visualizations.

Major Outcomes:

• **Interactive Filtering:** The Streamlit sidebar successfully allows users to filter 120 years of Snowflake data by Year, Season, and Country dynamically.

• **KPI Metrics:** Top-level cards clearly display Total Medals, Total Athletes, and Active Nations based on the current filter selection.

• **Geospatial Clarity**: A plotted map visualization accurately displays global medal distribution, highlighting the dominance of North America and Europe.

• **Trend Analysis**: Line charts reveal the exponential growth in athlete participation and the steady rise in female representation since the 1980s.

• **Performance by Sport:** A dynamic bar chart breaks down the top performing sports for any selected nation, quickly revealing regional specializations (e.g., USA in Swimming/Athletics).
