Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	**Stage 1**	**Stage 2**	**Stage 3**
Actions *What does the customer do?*	Open workbook; identify question. Select overall or regional view.	Compare categories, countries and years. Use available filters.	Summarize patterns and prepare findings. Share workbook/report.
Touchpoint *What part of the service do they interact with?*	Skillwallet project page; packaged .twbx.	Tableau worksheet tooltips, filters and dashboard tabs.	Report, presentation/demo video, instructor review.
Customer Thought *What is the customer thinking?*	Which view answers my question? Are measures comparable?	Which pattern is visible? Is the metric definition clear?	Can I support this conclusion? What caveats should I state?
Customer Feeling *What is the customer feeling?*	Curious, but unsure where to start.	Engaged; may feel uncertain about definitions.	More confident when source coverage and limits are clear.

Process Ownership *Who is in the lead on this?*	Project owner: Keshav Trivedi. Responsible for workbook, evidence and final review. Add a data dictionary and source link.	Reviewer/instructor: validate definitions and required deliverables. Add clearer tooltips and consistent filters.	Data source owner: source URL/coverage must be documented if available. Publish a Tableau Story after validation.
Opportunities *How can we improve this stage?*	Check missing values and duplicates.	Document metric units and time coverage.	Record feedback and update conclusions.
